

Green Book

Product Full Name: Turtle Wax Black in a Flash Trim & Tyre Wax

Long form Description:

Turtle Wax Black in a Flash Trim and Tyre Wax, is an all-in-one treatment to bring exterior plastic and tyres back to life instantly. Enriched with silicones and waxes, it restores faded plastics back to their original condition and provides a deep, long lasting and water resistant finish. Black in a Flash is available in two formats – as a non drip gel or a convenient aerosol. Allows to achieve both matt and gloss finish.

Short Description:

Turtle Wax Black in a Flash Trim and Tyre Wax, is an all-in-one treatment to bring exterior plastic and tyres back to life instantly. Enriched with silicones and waxes, it restores faded plastics back to their original condition and provides a deep, long lasting and water resistant finish.

5 Bullets:

- Rich silicones and waxes bring faded plastic back to original condition
- Suitable for all exterior plastic, rubber, vinyl and tyres
- Water resistant to provide long durability
- Thick non-drip gel makes application easy
- Clear formula suitable for all colour of exterior plastics

Product Usage

How To Use:

1. Ensure all surfaces are clean and dry.
2. Shake bottle or can well.
3. Pour a small amount onto a small sponge or foam applicator and apply in a circular motion, working the product into the surface. Leave to penetrate for 3 to 5 minutes.

Turtle Tips:

For a matt/satin finish apply and wipe immediately with a clean cloth. Do not use if surface is hot to the touch. Do not use on motorcycle tyres, bicycles or tyre treads, or where a slippery surface is not desirable.

Accessories:

Foam Applicator
