

Heavy Duty Engine Degreaser

Description

STP Heavy Duty Engine Degreaser is a proven blend of powerful grease stripping and metal cleaning solvents, packaged for do-it-yourself use. It is designed to penetrate and dissolve heavy caked-on grease and grime to give the engine a professional clean.

Benefits of Using Heavy Duty Engine Degreaser

STP Heavy Duty Engine Degreaser:

- Penetrates and dissolves heavy dirt and deposits
- Is quick and easy to use
- Can be used on car, truck, van and tractor engines
- Must not be sprayed or dripped on external body paint, asphalt driveways or other surfaces affected by petroleum solvents – if contact occurs flush immediately with water

How STP Heavy Duty Engine Degreaser Works

The powerful solvents and grease removers in STP Heavy Duty Engine Degreaser work to attack dirt and deposits on metal surfaces, penetrating and removing layers of grime and dirt which are then washed away.

Directions for Using Heavy Duty Engine Degreaser

- i) Warm the engine for 5 minutes, and turn off. Cover the distributor to keep it dry.
- ii) Spray generously on a warm (not hot), dry engine.
- iii) Allow STP Engine Degreaser to penetrate and loosen grease and grime for 10-15 minutes.
- iv) Hose off with water. Use the minimum amount of water necessary to remove deposits.
- v) Uncover distributor and idle engine until dry.
