

HYBRID SOLUTIONS CERAMIC POLISH & WAX

Product Sell

Product Full Name : TURTLE WAX HYBRID SOLUTIONS POLISH & WAX

Long form Description

Turtle Wax Hybrid Solutions Ceramic Polish & Wax is a unique time saving alternative to traditional multi-stage paint correction systems. This product is ideal for those looking for all-in-one paint correction and protection, but may not have the time required for multi-stage systems. This new and innovative technology uses precision polishing agents in platelet form that clean and remove paint imperfections as well as synthetic wax & superhydrophobic polymers infused with SiO₂ for ultimate protection, depth of color, gloss and shine. Use this product either by hand or machine to remove moderate scratches, oxidation and & swirl marks for amazing paint correction & durability in 1-step.

Short Description:

Turtle Wax Hybrid Solutions Ceramic Polish & Wax is a unique time saving alternative to traditional multi-stage paint correction systems. This product is ideal for those looking for all-in-one paint correction and protection, but may not have the time required for multi-stage systems. Superhydrophobic polymers infused with SiO₂ provide ultimate protection, depth of color, gloss and shine. Apply either by hand or machine to remove moderate scratches, oxidation and & swirl marks for amazing paint correction & durability in 1-step

5 Bullets:

- All-in-one product that cleans, shines, and protects your car's paint in a single step
- CERAMIC INFUSED, super hydrophobic and SiO₂ polymers deliver extreme water beading and chemical resistant protection that lasts for months
- SYNTHETIC WAX POLYMERS, hydro-activated formula increases depth of color, leaving behind a mirror-like shine and gloss
- Water-repellent formula helps prevent water spots and makes it easier to clean your car in the future
- Removes light to moderate swirl marks, scratches, and other imperfections from your car's paint

Product Sell

Turtle Wax Hybrid Solutions Polish & Wax is an all-in-one product designed to clean, shine, and protect your car's paint in a single step. The product is formulated with advanced hybrid polymers that provide long-lasting protection against UV rays, dirt, and other environmental contaminants that can damage your car's paint.

The product is easy to use and can be applied by hand or using a machine. It removes light to moderate swirl marks, scratches, and other imperfections from your car's paint while also restoring its shine and luster. The product is safe to use on all types of paint finishes, including clear coats.

Turtle Wax Hybrid Solutions Polish & Wax provides a high-gloss, protective finish that enhances the appearance of your car's paint. The product is also water-repellent, which helps prevent water spots and makes it easier to clean your car in the future.

Product Usage

How To Use:

Hand application

1. Wash your car thoroughly and dry it completely before applying the product
2. Shake the bottle well before use to ensure the product is well mixed
3. Apply 3-4 pea size of the product onto a foam applicator pad, working in a circular motion, and applying moderate pressure
4. Once the product has dried to a haze, use a clean and soft microfiber towel to buff off the residue, revealing a high-gloss, protective finish
5. Use a damp microfiber cloth or light mist of water to wipe the finish to activate the shine polymers. Re-wipe with dry microfiber cloth. Continue applying the product in the same manner over the entire car

Machine application

1. Wash your car thoroughly and dry it completely before applying the product
2. Shake the bottle well before use to ensure the product is well mixed
3. Apply 3-4 dime size of the product onto a foam applicator pad
4. Working in a 60x60cm section spread product onto surface at a low setting
5. Turn DA polisher to desire setting and apply light to moderate pressure in a cross-hatch pattern
6. Once the product has dried to a haze, use a clean and soft microfiber towel to buff off the residue, revealing a high-gloss, protective finish
7. Use a damp microfiber cloth or light mist of water to wipe the finish to activate the shine polymers. Re-wipe with dry microfiber cloth. Continue applying the product in the same manner over the entire car
