CLEANS

PREVENTS
UNEVEN
BRAKING

REDUCES BRAKE
NOISE

⚠ TAKE NOTE!

Avoid spraying or dripping on decorative substrates, where coatings may be affected and on plastics or rubber components. IMMEDIATELY flush with water if contact occurs.

PRODUCT DESCRIPTION

Uneven braking, noise and chattering can be caused by brake shoe and pad lining dust, brake fluid seepage, and slippery road film that contaminates brake drums and discs. STP® Professional Series Heavy Duty Brake Parts Cleaner will help improve brake action for smoother and more dependable performance.

STP® Professional Series Heavy Duty Brake Parts Cleaner assists in the prevention of uneven braking, noise and chattering by quickly dissolving and washing away lining dust, brake fluid, oily road film and grit to leave brake surfaces clean, without disassembly.

How it helps:

- ✓ Prevents uneven braking
- ✓ Cleans away lining dust, brake fluid, oily road film and grit
- ✓ Improves brake action
