

GLUE STICK HOBBY TRANSPARENT

TRANSPARENT GLUE STICKS FOR BISON GLUE GUN HOBBY - Ø 7 MM

PRODUCT DESCRIPTION

Transparent and high- strength HOT MELT glue sticks Blistercard with a diameter of 7 mm for DIY work, repairing, fixing, sealing and insulating. Ideal usable/workable in BISON GLUE GUN Hobby HOT MELT, but also suited for all commercially available hot melt glue guns with Ø 7mm glue sticks.

FIELD OF APPLICATION

Glues many porous and non porous materials in seconds such as wood, metal, stone, glass, tiles, ceramic, leather, textiles and many plastics. With a high meltig capacity and is suited for DIY and all household repairs. Glues almost all materials quickly, neatly, permanently and reliably. Ideal for fixing, repairing, isolating and sealing. For example carpets, shoe soles and heels, mounting laths, skirting boards or glueing a loose tile. Multifunctional. Especially for do-it-yourself and semi-professional use. Not suitable for PE, PP, PTFE, as well as heat sensitive materials. Supporting elements or objects permanently under tension.

PROPERTIES

- Transparent and high- strength
- Short setting time
- Solvent free
- Ø 7 mm

PREPARATION

Working conditions: Not to be applied at temperatures below +5°C.

APPLICATION

Directions for use:

Apply the glue quickly, and not too sparingly. Stick the two pieces together immediately. Always apply the glue to the harder material. Glue application: on flexible surfaces, apply the glue in thick lines; on hard surfaces, you can apply the glue in thick lines or in dots. The glue can be used to fill small holes and cracks.

Open time: 15-20 seconds

Stains/residue: Cured adhesive residue can only be removed mechanically.

Points of attention: Do not use at temperatures below +5°C. Never remove glue sticks from glue gun, this could damage the mechanism.

CURE TIMES*

Drying/Curing time: approx. Less than 1 minute

* Curing time may vary depending on a.o. surface, product quantity used, humidity level and ambient temperature.

TECHNICAL PROPERTIES

Temperature resistance: Up to approx. +70°C.

Chemicals resistance: Resistant to washing powders and detergents.

TECHNICAL SPECIFICATIONS

Chemical base: Ethyl Vinyl Acetate

Colour: White (Transparent)

Solid matter: approx. 100 %

Density: approx. 0.92 g/cm³

Shrinkage: approx. 0 %

STORAGE CONDITIONS

At least 24 months after date of manufacture.
