Product Full Name : Turtle Wax Concentrated Snow Foam

Long form Description:

Turtle Wax Concentrated Snow Foam Shampoo is a pH balanced vehicle foam cannon wash that is safe for all exterior surfaces. The high lubricity formula will help lift and encapsulate dirt from paint and suspend it in the lather minimizing scratching while performing your pre contact wash process. It can also be used a conventional wash to remove dirt, traffic film, grime and oils with ease. When used in combination with a foam cannon a thick and rich long work time foam is created providing the user the finest wash experience possible. A foam cannon also gives the user the opportunity to maximize the pleasant bubble gum fragrance.

Short Description:

Turtle Wax Hybrid Snow Foam is a pH balanced vehicle foam cannon wash that is safe for all exterior surfaces. The high lubricity formula will help lift and encapsulate dirt from paint and suspend it in the lather minimizing scratching while performing your pre contact wash process. It can also be used in conventional bucket contact wash to remove dirt, traffic film, grime and oils with ease. When used in combination with a foam cannon a thick and rich long work time foam is created providing the user the finest wash experience possible. A foam cannon also gives the user the opportunity to maximize the pleasant bubble gum fragrance.

5 Bullets:

- Luxurious Lather with exclusive Hybrid rich foam conditioners infused with biodegradable cleaning detergents
- pH balanced with a long dwell time foam that helps prevent swirls and won't strip sealants, waxes and coatings
- Foam sprayer or hand wash both ways give you suds for days
- Environmentally friendly formula with a Bubble Gum Scent

Product Usage

How To Use:

Pre-Wash Snow Foam Application

1. Rinse your vehicle to remove any areas of heavy dirt build up.
2. Add 200ml of product to your foam cannon solution bottle, top this off with water before shaking to mix.
3. Fix the solution bottle to the cannon and then to the pressure washer
4. Adjust the spray pattern and water mix valve as required prior to application
5. Working from the top down and in side to side motion cover the entire surface of the vehicle.

Contact Wash Directions:

6. Rinse your vehicle to remove any areas of heavy dirt build up.
7. Add 60ml to 90ml to a 20LTR bucket, and fill with water to generate suds.
8. Wash the vehicle from top to the bottom with a wash mitt, re-charging the mitt with new suds regularly.
9. Rinse away all the suds and dry with a microfibre towel or chamois.

Turtle Tips:

Do not use in direct sunlight or allow the foam to dry onto paintwork surface as streaking may occur. Typical use 300ml per vehicle as a pre-wash and 60-90ml for bucket contact wash.

Accessories: Hardware and user dependent, approximate guide only.
