Product description

High quality lubricant to treat chains and gear wheels of bikes. Chain spray sport has a very low friction factor for minimal resistance, maintaining the outstanding lubricating properties, even at heavy load. Extremely suitable for chains and gear wheels of racing, cross and mountain bikes. For heavy circumstances we advise to use MoTip Cycling Chain Spray Ultra.

Applications

Racing bikes
Cross bikes
Mountain bikes

Product characteristics

Very low friction factor for minimal resistance
Outstanding lubricating properties at heavy load
Contains ceramic particles
Prevents wear
Reduces the adhesion of dirt
Resistant to weather influences
Water-repellent
Directed jetspray
360° Valve

Physical and Chemical Characteristics

Basis	:	Synthetic Oil with ceramic particles
VOC-content	:	Approximately 85% w/w
Colour	:	Transparent white
Scent	:	Characteristic
Relative density at 20°C	:	0,88 g/ml
Yield	:	1,5 – 2,0 g/sec
Vapour pressure at 20°C	:	Approximately 3 bar

Usage

Before use, carefully read the directions on the packaging and act accordingly.

The aerosol should have room temperature.
Best processing temperature 5 to 30°C.
Before use, shake the aerosol.

Clean the chain and the gear wheels. Apply the chain spray in two thin layers.
For an optimum result, slowly rotate the chain after treatment.
