PRODUCT SELL: HYBRID SOLUTIONS FABRIC PROTECTOR

Product Full Name: Hybrid Solutions Fabric Protector 500ml

Long Form Description:

Turtle Wax Hybrid Solutions Fabric Protector is an easy to apply yet advanced hydrophobic stain repelling coating for all automotive fabrics but specifically intended for Soft Top Roofs, Interior Upholstery, Carpets, Mats and Door linings. 'Flex-Coat' Technology incorporates Ceramic SiO₂ Ingredients which are easily absorbed into fabrics without causing any change to the appearance or texture. When applied to interior automotive fabrics the stain repelling coating protects against common staining caused by drinks and food spillages, such like coffee, tea, fizzy drinks, chocolate and pastries. Its performance excels when used on soft top roofs. It can be used on mohair, canvas and modern fabric roofs to create a durable hydrophobic barrier which actively repels water and oil-based road contaminants that cause unsightly staining and colour fading to your soft top roof over time. Your soft top will stay cleaner, more vibrant and resist staining for months.

Short Form Description:

Turtle Wax Hybrid Solutions Fabric Protector is an easy to apply yet advanced hydrophobic stain repelling coating for all automotive fabrics but specifically intended for Soft Top Roofs, Interior Upholstery, Carpets, Mats and Door linings. The stain repelling coating protects against common staining caused by drinks and food spillages, such like coffee, tea, fizzy drinks, chocolate and pastries. Its performance excels when used on soft top roofs. It can be used on mohair, canvas and modern fabric roofs to create a durable hydrophobic barrier which actively repels water and oil-based road contaminants that cause unsightly staining and colour fading to your soft top roof over time.

Key Features:

- FLEX-COAT TECHNOLOGY incorporates Ceramic SiO₂ ingredients to create a stain repelling

PRODUCT USEAGE :

DIRECTIONS: INTERIOR FABRICS & SOFT TOP ROOFS

1. Ensure all fabrics are cleaned and any stains removed, ideally using Hybrid Solutions All Fabric Cleaner. Soft top roofs need to have been rinsed thoroughly at the end of the cleaning process.
2. Shake bottle well. For interior fabrics test for colour fastness on an inconspicuous area first. No adverse change then continue use.
3. Ensure all fabrics are dry and apply using continuous sweeping trigger pulls until the area is covered evenly.
4. Allow to dry and repeat step 3. 1-2 more times to build layers and improve protection.

TURTLE TIPS:

Use Hybrid Solutions Fabric Surface Cleaner for the best synergistic performance. Not suitable for Alcantara fabric. Over spray onto glass and bodywork remove immediately. For best results on soft top roofs protect from rain for a minimum of 12 hours following application.

FAQ's:

Q1: Will this product change the colour of my interior upholstery?

Answer: It is very unlikely that it will change the colour or appearance but we would advise to test on an inconspicuous area first and should any adverse reaction occur then don't continue use

Q2: How often should the protector be applied to soft top roofs?

Answer: Under normal driving conditions we would advise 2 applications per year for maximum protection against the elements. Ensure that the roof is cleaned each time prior to application using Hybrid Solutions Fabric Cleaner

Q3. How long should I leave to dry on my Soft Top roof?

Answer: Ideally leave to dry for 12hrs and in that time protect from any rain if possible, this will increase the durability and hydrophobic protection

Q4. Should I clean the interior fabrics before applying this?

Answer: Yes, even if they are only slightly dirty it is recommended to use vacuum all loose dirt first and follow up with Turtle Wax Hybrid Solutions Fabric Cleaner to remove any staining etc.

Q5. Is it safe for pets to sit on the interior upholstery following application?

Answer: Yes, once fully dried it is safe for pets to sit on vehicle seats
