

HYBRID SOLUTIONS CERAMIC SPRAY COATING

Product Sell

Product Full Name : TURTLE WAX HYBRID SOLUTIONS CERAMIC SPRAY COATING

Long form Description

Turtle Wax Hybrid Solutions Ceramic Wax Coating is the ultimate method of long-lasting ceramic protection on your vehicles surface. This easy to use product sprays on and wipes off with very little effort while delivering superior shine and protection, while also delivering unmatched hydrophobicity and ceramic protection that will last a minimum of 6 months. Turtle Wax Hybrid Solutions Ceramic Wax Coating, when used even occasionally as part of your regular maintenance schedule, keeps your car's exterior looking new and helps your car stay cleaner longer with a super-hydrophobic protective barrier to help prevent dusty soils from re-depositing on exterior surfaces. With Turtle Wax Hybrid Solutions Ceramic Wax Coating, car care has never been easier.

Short Description:

Turtle Wax Hybrid Solutions Ceramic Wax Coating is the ultimate method of long-lasting ceramic protection on your vehicles surface. This easy to use product sprays on and wipes off with very little effort while delivering superior shine and protection, while also delivering unmatched hydrophobicity and ceramic protection that will last a minimum of 6 months.

5 Bullets:

- Hybrid Solutions Ceramic Spray Coating offers long-lasting protection for all paintwork types,
- Super hydrophobic and SiO2 polymers deliver exceptional water repelling, water sheeting, and chemical resistance that can endure for up to 12 months.
- Versatile spray coating can also be applied to glass and exterior trim to provide additional protection against harmful UV rays and other environmental elements.
- Deep, mirror-like shine that significantly enhances the overall appearance of your vehicle's paintwork.
- Enthusiasts seeking both a pristine look and robust protection will find Hybrid Solutions Ceramic Spray Coating to be an ideal choice for their automotive maintenance needs.

Product Sell

Turtle Wax Hybrid Solutions Ceramic Spray Coating is a high-performance spray coating designed to provide long-lasting protection for all types of paintwork. The product combines advanced ceramic and SiO₂ polymers to create a hydrophobic barrier that repels water, dirt, and other contaminants, keeping the vehicle's surface cleaner for longer periods.

The spray coating is easy to use and can be applied quickly without any special tools or equipment. The product creates a deep, mirror-like shine that enhances the appearance of the vehicle's paintwork, while also protecting it against environmental factors that can cause damage and discoloration.

Turtle Wax Hybrid Solutions Ceramic Spray Coating is safe to use on all types of paint, including clear coat, single stage, and metallic paint. The product can also be used on glass and exterior trim to provide added protection against UV rays and other harmful elements.

Product Usage

How To Use:

1. Wash the vehicle thoroughly with a car shampoo and dry it with a clean microfiber towel
2. Shake the bottle well before use to ensure that the product is mixed properly
3. Spray a small amount of the product onto the vehicle and spread and wipe with a clean microfiber towel, use a separate microfiber towel buff
4. Repeat the process on the remaining sections of the vehicle until the entire surface is covered with a thin, even layer of the spray coating

NOTE:

Apply a second coat for 12 months of protection and insane water beading/sheeting. Allow paint to cure for 24hrs before washing and applying an additional coat.

Accessories:

- Microfiber Towels

Partner Products:

- Hybrid Solutions 3 in 1 Detailer

Technical Fact Sheet

Product Name: TURTLE WAX HYBRID SOLUTIONS CERAMIC WAX COATING (SPRAY WAX) 53409

Product Concept:

Turtle Wax Hybrid Solutions Ceramic Wax Coating is the ultimate method of long-lasting ceramic protection on your vehicles surface. This easy to use product sprays on and wipes off with very little effort while delivering superior shine and protection, while also delivering unmatched hydrophobicity and ceramic protection that will last a minimum of 6 months. Turtle Wax Hybrid Solutions Ceramic Wax Coating, when used even occasionally as part of your regular maintenance schedule, keeps your car's exterior looking new and helps your car stay cleaner longer with a super-hydrophobic protective barrier to help prevent dusty soils from re-depositing on exterior surfaces. With Turtle Wax Hybrid Solutions Ceramic Wax Coating, car care has never been easier.

Product Qualities:

Physical Characteristics:

A water thin, milky white emulsion with a tropical scent.

Chemical Ingredient Claims:

Turtle Wax Hybrid Solutions Ceramic Wax Coating contains waxes, superhydrophobic additives and high performance protective agents which adhere to an automotive paint surface for extremely long lasting protection.

Packaging:

16 fl. oz. HDPE trigger bottle with an adjustable sprayer.

Directions:

Wash & Dry Car. Shake well. Mist 3 to 4 sprays per panel. Gently spread and wipe with a clean, folded microfiber towel. Turn microfiber towel over and wipe to a high gloss shine. Can be used on all non-porous exterior surfaces including glass. Do not use on convertible tops.
