

HYBRID SOLUTIONS CERAMIC WASH & WAX

Product Sell

Product Full Name : TURTLE WAX HYBRID SOLUTIONS CERAMIC WASH & WAX

Long form Description

Turtle Wax introduces Hybrid Solutions Ceramic Wash & Wax, a pH balanced premium vehicle wash that is safe for all safe on exterior surfaces and surfaces treated with ceramic coating technology. This wash will provide maximum hydrophobicity (water-repellency) even after just one use, and can be used in conjunction with all Hybrid Solutions products to boost the ceramic enhanced protection on the vehicles surface. The innovative high lubricity formula will help lift and encapsulate dirt from paint and suspend it in the lather minimizing scratching while performing your wash process. Expect an invigorating tropical scent when used in a traditional 2 a bucket method wash.

Short Description:

Turtle Wax introduces Hybrid Solutions Ceramic Wash & Wax, a pH balanced premium vehicle wash that is safe for all exterior surfaces and surfaces treated with ceramic coating technology. This wash will provide maximum hydrophobicity (water-repellency) even after just one use and can be used in conjunction with all Hybrid Solutions products to boost the ceramic enhanced protection on the vehicles surface.

5 Bullets:

- 2-in-1 formula washes and waxes in one easy step
- Super Hydrophobic & SiO2 polymers creates a durable barrier for both coated and uncoated cars. It will boost water beading and sheeting, to save time while drying
- Re-washing and or regular cleaning adds additional layers of protection, repelling water and contaminants
- Enhances the appearance and adds shine to exterior plastic and trim
- Adds a layer of shine and protection to your vehicle's finish

Product Sell

The Turtle Wax Hybrid Solutions Ceramic Wash & Wax is a 2-in-1 formula that washes and waxes your vehicle in one easy step. It contains SiO₂ ceramic wax for added protection and durability. The pH-balanced formula is safe for all vehicle surfaces, including paint, glass, and plastic, and won't strip wax or sealant from your vehicle. The advanced foaming technology removes dirt and grime without scratching, and adds a layer of shine and protection to your vehicle's finish. It leaves behind a hydrophobic surface that repels water and makes drying faster and easier. The Ceramic Wash & Wax is easy to use - simply add to a bucket of water, apply to your vehicle with a sponge or wash mitt, and rinse off. It can also be used as a maintenance wash to extend the life of your vehicle's wax or ceramic coating.

Product Usage

How To Use:

1. For routine cleaning add 3 FL oz to a bucket and top off with a gallon of water
2. Rinse exterior surfaces with a strong stream of water to remove loose soils and to cool surface
3. Wash vehicle from top to bottom using a microfiber mitt
4. Washing one panel at a time and rinsing after wash

NOTE:

Re-washing will add layers of shine and protection. You can re-wash before your final rinse and dry.

Accessories:

- Turtle Wax Bucket
- Microfiber Wash Mitt

Partner Products:

- Hybrid Solutions Wet Wax
- Hybrid Solutions Polish & Wax
- Hybrid Solutions Ceramic Spray Coating

Technical Fact Sheet

Product Name: TURTLE WAX HYBRID SOLUTIONS CERAMIC WASH & WAX 53411

Product Concept:

Turtle Wax introduces Hybrid Solutions Wash & Wax, a pH balanced premium vehicle wash that is safe for all exterior surfaces and surfaces treated with ceramic coating technology. This wash will provide maximum hydrophobicity (water-repellency) even after just one use and can be used in conjunction with all Hybrid Solutions products to boost the ceramic enhanced protection on the vehicles surface. The innovative high lubricity formula will help lift and encapsulate dirt from paint and suspend it in the lather minimizing scratching while performing your wash process. While it exceeds expectations as a traditional wash, a thick and rich long work time foam is created when used in conjunction with a foam cannon giving the user the finest wash experience possible. Expect an invigorating tropical scent when used in a bucket or by foam cannon application. Wash, shine & protect in less time.

Conventional Products:

Many vehicle washes, either traditional or foam cannon, leave much to be desired with fast break foam, and low lubricity. Traditional washes also leave residue, streaking or allow for contaminants to scratch the vehicles finish during the wash process.

Product Qualities:

Physical Characteristics:

A yellow, thin liquid, with a pleasant tropical scent.

Chemical Ingredients:

Buffering agents (pH balanced) to neutralize harsh environmental pollutants and road soils.

Luxurious foam and lubricity additives to safely suspend and pull dirt and grime away.

Refreshing blast of tropical scent.

Packaging:

48 FL. OZ. (3 PTS.) 1.42 L

DIRECTIONS: For routine cleaning, add 3 fl. oz. to a bucket and top off with a gallon of water. Rinse exterior surfaces with a strong stream of water to remove loose soils and to cool the surface. Wash vehicle from top to bottom using a microfiber wash mitt. Do not let product dry on finish. Wash one panel at a time and rinse thoroughly with a fine spray of water to observe water beading. Re-washing will add layers of shine and protection. Use a final flood of water to rinse and induce the sheeting/self-dry feature. Towel dry as necessary.

NOTE: Use 1 fl. oz. to pre-clean vehicle prior to applying waxes/coatings. Can be layered with HYBRID SOLUTIONS SPRAY COATING, HYBRID SOLUTIONS CERAMIC POLISH & WAX or other previously applied waxes or coatings. Not recommended for use in a foam sprayer.
