

TURTLE WAX® SCRATCH REPAIR & RENEW

Product Sell

Product Full Name : TURTLE WAX® SCRATCH REPAIR & RENEW

Long form Description

Turtle Wax® Scratch Repair & Renew is a new innovative formula that features our proprietary Heal & Seal technology, with permanent results that will not wash away at your next car washing. Formulated with precision platelets that safely work away scratches, swirls, paint transfer, water spots and more, leaving behind a brilliant shine. Can be applied by hand with a microfiber towel or my machine. Simply place a small amount on towel or polishing pad and work the product into the blemish for 30 seconds. Repeat until desired results are achieved.

Short Description:

Scratch Repair and Renew is an innovative formula that uses precision platelets to safely remove scratches, swirls, paint transfer, and water spots. It features a protective resin that creates a barrier for permanent paint restoration that won't wash away. The easy-to-use product can be applied by hand or machine, providing cost-effective and long-lasting results.

Bullets:

- Self-aligning platelets permanently remove light to heavy scratches (up to 1000 grit), swirls, paint transfer, water spots & more
- Protective resins deposit a barrier for permanent paint restoration
- With Heal & Seal™ technology you don't have to worry about damaging paint or creating an uneven appearance
- Safe & effective by hand or machine – no experience necessary
- Repairs years of damage in 1 use

Long form Description

Introducing Scratch Repair and Renew, the revolutionary solution to all your car paint woes. Our proprietary Heal and Seal™ technology ensures that your car's paint job stays looking as good as new, without any risk of it washing away during your next car wash. Say goodbye to unsightly scratches, swirls, water spots, and paint transfer with this innovative formula that will leave your car with a brilliant shine.

At the heart of Scratch Repair and Renew is our precision platelets. These work tirelessly to safely remove any blemishes on your car's paint, leaving it looking brand new. Years of damage can be reversed in just one use, with permanent results that are guaranteed to impress. You no longer must worry about investing in expensive bodywork or repainting your car, as Scratch Repair and Renew provides a cost-effective solution that can be achieved in the comfort of your own home.

Our protective resins deposit a barrier that ensures your car's paint stays looking perfect for the long haul. The barrier created by our formula is so effective that it won't wash away during your next car wash. The result is permanent paint restoration that doesn't fade or lose its luster over time. This feature alone makes Scratch Repair and Renew a must-have for anyone who values the longevity of their car's paint job.

Using Scratch Repair and Renew is incredibly easy. You can apply it by hand with a microfiber towel, or by machine. Simply place a small amount of the formula onto a towel or polishing pad and work it into the blemish for 30 seconds. Repeat until the desired results are achieved. It's that simple! With just a few easy steps, your car will be restored to its former glory.

In summary, Scratch Repair and Renew is an innovative and easy-to-use solution that will save you time and money, while restoring your car's paint to its original condition. It features Heal and Seal™ technology that ensures permanent results, precision platelets that work to safely remove blemishes, and protective resins that create a barrier to keep your car's paint job looking new for years to come. Don't settle for a less-than-perfect paint job. Try Scratch Repair and Renew today and experience the difference for yourself.

Short Description:

Turtle Wax Scratch Repair & Renew is a new innovative formula that features our proprietary Heal & Seal™ technology, with permanent results that will not wash away at your next car washing. Formulated with precision platelets that safely work away scratches, swirls, paint transfer, water spots and more, leaving behind a brilliant shine. Can be applied by hand with a microfiber towel or my machine. Simply place a small amount on towel or bonnet, and work the product into the blemish for 30 seconds. Repeat until desired results are achieved.

Product Usage

How To Use:

1. For best results, apply on a cool, clean surface.
2. Test first on an inconspicuous area. Not for use on flat or matte finishes. Keep off plastic trim.
3. FOR USE BY HAND: Dispense a small amount onto a foam applicator pad or a small, clean microfiber towel. Use gentle back & forth pressure for 30 seconds. Reapply until desired results are achieved. Finish by wiping lightly with a microfiber towel.
4. FOR USE WITH D.A. POLISHER/ORBITAL: Dispense a small amount onto a clean, soft foam pad. Apply with 1500 RPMs and light pressure.

Accessories:

- Microfiber Towels

Partner Products:

- Super Hard Shell Liquid Wax

Technical Fact Sheet

Product Name: TURTLE WAX SCRATCH REPAIR & RENEW HEAL & SEAL, 50935

Product Concept:

Turtle Wax Heal & Seal is formulated with precision polish platelet technology to remove light oxidation, minor scratches and swirl marks to brighten and improve automotive finish clarity. New precision polish ingredients “self-align” to remove common abrasions and light swirl marks by hand or by machine. The self-aligning polishing ingredients means anyone can use the product. Just apply with back and forth motion using a microfiber towel until all scratches are removed and you get the desired appearance wanted. Don’t worry about damaging paint or creating an uneven appearance, Turtle Wax Scratch and Swirl Repair Heal & Seal blends in the repair with surrounding paint. The formula is not a cover-up. Scratches are permanently removed by the platelets, so don’t worry about scratches reappearing after a wash.

The fast polish formula restores a new car look easily and safely by removing surface imperfections while healing and then sealing your vehicles surface with an advanced coating sure to withstand the test of time. Turtle Wax Heal & Seal is ideal for all car finishes with hard or soft paint coating, including today’s bright clear coat finishes. The polish can be used directly on scratched areas, or for general finish cleaning and oxidation removal. Its ultrafine tri-polish polishing platelets smooth away light blemishes, leaving a high gloss, reflective shine.

Turtle Wax Heal & Seal can be used with a DA or rotary polisher and medium foam pad. Self-aligning platelets will quickly polish and seal a finish in one step! No need to worry about creating holograms or buffer trails. By hand or by machine the formula smooths surface paint to a glass like shine and leaves a high protective long- lasting shine. Use any TW spray wax regularly to maintain the finish.

The formula provides precision cleaning that is also effective at restoring clarity to clear hard plastics. This is also the perfect product for removing cloudy oxidation from headlight and tail light lenses.

Product Quality:

Physical Characteristics:

A white, medium viscosity liquid based in an oil-in-water emulsion.

Chemical and Ingredient Attributes:

Ultrafine precision polish platelet technology augmented by mild lubricant polymers, petroleum distillates safely, quickly, and easily remove minor scratches and swirl marks. Acrylic resin complexed with high refractive polymers and brighten and restore color and shine to many modern exterior surfaces. UV inhibitors provide lasting protection to the glossy durable finish.

Packaging:

7 FL. OZ. (207 ml.), PETE plastic bottle.

Directions For Use:

Wash and dry car.

For Scratch Removal: Shake well before using. Pour Turtle Wax Heal & Seal onto a damp microfiber towel or applicator and rub on the scratch (in the direction of the scratch) with firm fingertip pressure. Use a back and forth movement until blemish disappears or until the scratch becomes invisible (about 30 seconds). Buff lightly with a clean microfiber towel. Repeat application if necessary. Can be applied repeatedly as directed until desired appearance is achieved. Self-aligning platelets prevent accidental gouging of paint.

For Machine application, apply with a foam pad @ 1500 rpm and remove excess product with a micro fiber towel.
